With a range of intelligent solutions...

From easy-to-use sizing software to our unique SoftTalk and ValTalka custom configuration software to electronic positioners and level switches to remotely controlled, fully-wired and remote electronic, hydraulic, and pneumatic actuators, Flowserve offers a range of intelligent flow control solutions for every application. Couple the Flowserve range of control solutions with real-time system analysis, predictive maintenance, and remote service capability, and you will find end-to-end intelligence that has no equal in the industry.

Flow Control Division

Actuation and Control Solutions

Flowcontrol solutions for the world at work.

Flowserve is the world’s premier provider of industrial flow management services. The Company produces engineered pumps, precision mechanical seals, automated and manual quarter-turn valves, control valves and actuators, and provides a range of related flow management services, primarily in the process industries. Flowserve operates in over 50 countries through three divisions: the Pump Division, the Flow Control Division, and the Flow Solutions Division.

To contact your nearest Flowserve automation and control supplier, visit www.flowserve.com or email fcdinfo@flowserve.com

Flow Control Division

With a range of intelligent solutions...

With an ever-increasing need for efficient and reliable control solutions, the Flowserve Flow Control Division offers a comprehensive range of products and services. From easy-to-use sizing software to our unique SoftTools, StarTalk and ValXplore custom configuration software to electronic positioners and level switches to remotely controlled, fully-automated electric, hydraulic, and pneumatic actuators, Flowserve offers a range of intelligent flow control solutions for every application. Coupled with Flowserve’s range of control solutions, with real-time system analysis, predictive maintenance, and remote service capability, you will find no better solution in the industry.

Actuation and Control Solutions

Your global source of valves, automation solutions, services, and support from the world’s flow management leader.

Flowserve is the world’s premier provider of industrial flow management services. The Company produces engineered pumps, precision mechanical seals, automated and manual quarter-turn valves, control valves and actuators, and provides a range of related flow management services, primarily for the process industries. Flowserve operates in over 100 countries through three divisions: the Pump Division, the Flow Control Division, and the Flow Solutions Division.

To contact your nearest Flowserve automation and control supplier, visit www.flowserve.com or email fcdinfo@flowserve.com.

Flow control solutions for the world at work.
We add automation to process...

Process automation is driven by the need for increased productivity, cost reduction, and enhanced safety. The Flowserve range of valve automation and control solutions is designed to provide valve manufacturers, contractors, facility managers, and re-fitters with everything needed to bring the latest in linear quarter-turn and multi-turn control valve automation to their plant or process.

...and process to control

Featuring seamless direct-to-host integration with all the major DCS, PLC and PC-based automation systems, foundation fieldbus networking, and robust open standards technology, the Flowserve customer gains unmatched interoperability to take advantage of the very latest in automation systems integration and protocols. Active partnerships with all the major automation systems vendors ensure that your control and automation project will have smooth commissioning and long-term support.

Actuation & Control Solutions

Flow Control Division

Norbro pneumatic and electric actuators together with a range of positioners and a variety of flow control equipment.

Limitorque products include multi-turn and quarter-turn electric actuators and valve control networks automating valves in some of the harshest environments imaginable.

Automax supplies a range of valve automation systems including rack & pinion, scotch yoke and electric actuators, positioners, switches and accessories, and automation packages.

PMV is a leading manufacturer and supplier of valve positioners to the world’s largest control valve companies.

Worcester Controls electric and pneumatic actuators and computer interface components for analog or digital control and communication.

Actuation & Control Solutions

Flow Control Division

• Accord positioners and limit switches provide complete valve automation control, and are available in a wide range including explosion-proof and sanitary applications.

• Norbro pneumatic and electric actuators together with a range of positioners and ancillary flow control equipment.

• Limitorque products include multi-turn and quarter-turn electric actuators and valve control networks, automating valves in some of the harshest environments imaginable.

• Automax supplies a range of valve automation systems including rack & pinion, Scotch-yoke and electric actuators, positioners, switches and accessories, and automation packages.

• PMV is a leading manufacturer and supplier of valve positioners to the world’s largest control valve companies.

• Worcester Controls’ electric and pneumatic actuators and computer interface components for analog or digital control and communication.

• Logix digital positions designed for fast, accurate control using various fieldbus protocols. Easily calibrated and commissioned without the need of a configurator or other software.

• Norbro pneumatic and electric actuators together with a range of positioners and valves for flow control equipment.
