

Argus™ Engineered Ball Valve Quick-Ship Program

Manual and automated engineered ball valves in one week or less

During routine maintenance and emergency repairs, speed is everything. For every hour of downtime, an operation can lose millions in revenue. Getting replacement valves quickly could mean sacrificing quality for speed. But that's not the case with our Argus Engineered Ball Valve Quick-Ship Program.

With the Argus Ball Valve Quick-Ship Program, you'll receive quality, Flowserve-tested Argus valves anywhere in North America in one week, and in many cases, we can deliver valves within 72 hours or less, so you can reduce downtime and keep your operation moving.

The Quick-Ship program provides access to:

- Argus FK79 ball valves
- Argus FK76M ball valves

The Quick-Ship program includes manual valves or fully automated packages with a standard selection of actuators and accessories.

Argus FK76M valve

Key benefits

Reduce maintenance-related downtime.

We can size, select, build, test and ship standard Argus ball valve configurations in one week or less, minimizing downtime and allowing faster return to operations. Lead times may vary depending on application, configuration and geographic location.

Have confidence that you're receiving high-quality engineered valves.

With the Argus Ball Valve Quick-Ship Program, you'll have confidence that you're getting a quality, Flowserve-tested valve. All valves supplied under the program undergo seat leakage testing as per applicable API standards and a detailed and documented ISO:9001 final inspection. Argus ball valve hydrotesting is available with short lead times.

Superior performance

Argus ball valves offer superior performance in arduous applications requiring high-integrity valve seating and stem sealing.

Available configurations under the Quick-Ship program

Model	FK79 and FK76M
Body Style	Ball valve (on-off)
Size NPS	0.5 to 6 in
Pressure Class	Class 300
Port Area	Full port
End Flanges	Raised face flanges
Body Materials	LCB, LF2, CF8M and F316 Ti
Bonnet Style	ISO15848, EPA and HT-SB
Trim Material	CF8M, F51, F51 + Carbide
Seat Material	F51 + Carbide, PTFE
Stem Seal Material	Graphite, PTFE + Graphite
Actuator*	Automax™ Supernova rack and pinion or RG series Scotch yoke
Positioner	Logix™ 3800, Logix 3220, Logix 3420, Logix 500 and XLTM
Accessories	Air filter, air filter regulator, coalescing air filter regulator (Valtek®) Solenoid: ASCO 8615, four-way, brass body, 120 VAC or 24 VDC Switch box: Ultraswitch or Westlock with SPDT mechanical or proximity – 24 VDC

The Quick-Ship program includes manual valves and fully automated valve packages.

**Flowserve can supply a complete automated package, including third-party actuators, within 2 weeks.*

Contact Flowserve for more details and additional delivery options related to the Quick-Ship program.
